Classic Arcade Goodness !. More Princess Remedy! If you liked the first game, you'll definitely like the second one. It's pretty much more of the same, but more polished.. bloody hard. This game is the bee's knees. More teamwork than most games.. I don't remember buying this, maybe I was drunk? Either way, this game is terrible, stay away.. Nice minimalistic puzzle game from the creator of the ZUP series.. Very fun and addicting... But also enraging... Still, get the game! It's amurzing!. Wow this game is absolutly wonderful. The controls take a little while to understand but once you have them the game play reminds me of Halo! I was having fun the entire time I was playing and this is automatically going into my top of my favorite games! The only suggestion I would have is to try to make the level creation a little easier to understand. This was is going to be huge though! Great job devs you guys have something really amazing here!. This game is really bad!

Awful optimalization

My GPU is on max...

Laggy ...

MY ARM! lol oh man this game keeps you going for hours. This game is a great game to pass time. You will definitely get your money's worth if you purchase this game. You have everything from shooting things with bows to using shields to repel balls into the opponents goal to crushing the s\*\*t out of a ball using a lightsaber bat!

Pros: Hours of fun only reason I stopped was because my arm got tired! and even then I could just change game play to a different type of game.

Cons: 0

IMO GET IT!. This is a pretty nice version of a Bomberman with variety of characters with unique abilities, which really make the brawls tough. There are a few modes of play including arenas, duels, co-op and campaing. Each of these delivers different gaming experience and requires slightly different skills. What is most important, mastering uninqe abilities of the characters boosts your chances of winning at least by a few miles... and the campaing can get extremely hard.

The game has perfect gamepad support so it feels like your playing on a console. Great for local multiplayer but it's a bit of a shame that there are practically no online games on PC so far. Hope it will change in the future becasue BRAWL has a lot of potential for a really good fast-paced multiplayer game.

Would rate 8/10 - money well spent.. Saw a Soldier with a Greatsword, tryd to kill him to get his sword, he killed me in one hit, made me laugh - because it made sense, loved it.

Want a Good Game? Buy this, play it a few hours, have fun; then wait until its "Done" and have even more fun.

But, be warned, at the moment, its kinda buggy (because early access) - you may fall through floors in some Areas, dont get frustrated.

Looks awesome, is fun. Very Impressiv. I really like it.. this game was so promising when i bought it in 2015. now almost 4 years later pretty much nothing has changed and the dev team have ran off with our money. i dont know why this game is still for sale. Don't buy! Can't even play the game because the DRM doesn't work and will probably never be fixed! AVOID AT ALL COST!. At first gaze this game looked like a hacking game.

I was like: "yees finally a new hacking game which looks interesting"

In the tags I noticed: "puzzle"

Well, this game turned out to be one hell of a puzzle.

I just finished the first episode but seriously:

This game has some tricky puzzles you wont be able to solve so quick.

Thats what this game makes worth playing it.

The puzzles and the story are in my opinion very nice.

If you are a fan of puzzles, you definitely need to play Mu Complex ^^. Handball is a great sport.

Dunkerque rules !
